Experience

Cybersecurity Consulting Intern **Jun 2026 – Present**

Arcova | Python, FastAPI, Next.js, TypeScript, Azure, Vertex AI, LangChain, PostgreSQL *Holmdel, NJ*

- Shipped a full-stack AI platform to Azure behind Entra ID SSO and 300+ CI tests, launching 4 LLM features to production
- Architected keyless Claude inference on Vertex AI with IAM auth, eliminating 100% of stored credentials for SOC 2
- Ported an agentic LangChain research pipeline with web-search tooling, slashing client research time by 95%

Software Engineer **Sep 2025 – May 2026**

PirateShield | Python, TypeScript, Docker, Git *Newark, NJ*

- Implemented Zero-Trust anomaly detection using Python and TypeScript, boosting IoT response by 45% across networks
- Optimized multi-threaded event processing with Docker, cutting CPU usage 30% and enhancing real-time data throughput
- Created scalable plug-and-play security APIs, accelerating K–12 deployment time by 60% and assisting 10+ organizations

Software Engineer **Aug 2022 – Aug 2025**

Nobile Tech | Java, SQL, Redis, Docker, Kubernetes, Git *New York City, NY*

- Designed and launched 300+ custom game servers in Java, scaling to support over 2,500+ concurrent users
- Introduced automated monitoring and debugging tools, decreasing server downtime by 60% and advancing overall stability
- Amplified client traffic by 400% by launching 20+ web platforms through targeted SEO and social media strategies

Software Engineer Intern **Jun 2025 – Aug 2025**

Reality AI | React.js, Next.js, JavaScript, Tailwind CSS, PostgreSQL *New York City, NY*

- Automated educators' workflows using React.js and Next.js, reducing manual tasks by 15% and increasing productivity
- Built scalable real-time APIs with LangChain and Redis, managing 1000+ concurrent users while ensuring low latency
- Accelerated deployment speed by 40% through CI/CD pipelines with 85%+ test coverage, minimizing production errors

Projects

PirateFlow — Hackathon Winner | React.js, Python, Supabase, Tailwind CSS, FastAPI **Mar 2026**

- Led a 5-person team to develop AI room search, revenue tracking, and 7-day occupancy forecasting across 3 building types
- Engineered a real-time campus space intelligence platform, cutting ghost bookings by 71% with AI anomaly detection
- Deployed full-stack app to production across 5 buildings, achieving 99.9% uptime and reducing unauthorized access by 85%

CyberSmart | Python, Streamlit, SQLite, Scikit-learn, PyTorch, CSS **Aug 2025 – Dec 2025**

- Delivered an AI-powered cybersecurity platform with an MLP neural network, generating $5,000 revenue and engagement
- Promoted engagement by 75% and retention by 60% through adaptive learning modules on phishing and password security
- Streamlined SQLite tracking and neural network recommendations, revamping assessment accuracy by 30% across users

DocsGPT | Python, TypeScript, LangChain, Docker, Shell, PowerShell **Oct 2025 – Nov 2025**

- Enhanced DocsGPT, an open-source platform with 20,000+ users, improving AI prompt logic and RAG accuracy by 20%
- Resolved fixes for Docker deployments via Shell and PowerShell, minimizing setup errors by 60% across environments
- Refined mobile and desktop layout architecture, decreasing rendering issues by 35% and elevating usability for users

Marcode-AI | TypeScript, React.js, Next.js, PostgreSQL, OpenAI API, Docker, Vercel **Jul 2025 – Aug 2025**

- Developed a SaaS platform generating websites from text prompts, shrinking build time by 70% with 200+ daily outputs
- Expanded AI accuracy by 30% through engineering advanced natural language processing modules and prompt engineering
- Orchestrated Docker microservices on Vercel, maintaining 99.9% uptime and supporting 300% user growth

Technical Skills

Programming Languages: Python, Java, C++, JavaScript, TypeScript, SQL
Frameworks & Tools: React.js, Next.js, LangChain, Git, Docker, Kubernetes, AWS, Azure, PostgreSQL, MongoDB, Redis

Publications

RiskCast: Behavioral Risk Forecasting Across Multi-Modal Security Streams **Jun 2026**

ACM IWSPA '26 | S. Anand, M. Ponce, D. Duong *Frankfurt am Main, Germany*

BBKR: Behavior-Driven Key Rotation for Zero Trust Network Security **Jun 2026**

ACM SaT-CPS '26 | S. Anand, M. Ponce, D. Duong *Frankfurt am Main, Germany*

Education

Seton Hall University *South Orange, NJ*

Bachelor of Science in Computer Science, GPA: 3.8 **May 2026**

Master of Science in Cybersecurity, GPA: 4.0 **Expected: Aug 2027**
